

Japan Enterprise Applications and Solutions

AN IDC CONTINUOUS INTELLIGENCE SERVICE

The enterprise applications (EA) and solutions market will face severe conditions as a result of the global recession, with cost reduction on new implementations and justification for the replacement of legacy applications being two of the key challenges. IDC's *Japan Enterprise Applications and Solutions* service takes a three-pronged approach to the market: focus on quantitative data for market forecasts and user needs trends, review vendor strategies across solution sets in the enterprise applications space, and analyze new business opportunities. This service also includes market analysis of ERM, SCM, and PLM. In 2017, this service will enhance several researches to the cloud-based digital manufacturing.

Markets and Subjects Analyzed

- Market size and forecast of EA software
 - Competitive analysis of EA vendors
 - End-user survey of EA solutions
 - HCM payroll solutions
 - PLM solutions
-

Core Research

- Japan User Perception and Need for digital manufacturing and PLM Solutions
 - Japan EA User Perception and Needs
