

Japan Security Products and Services

AN IDC CONTINUOUS INTELLIGENCE SERVICE

Internet-related businesses are growing rapidly in Japan because of the availability of high-speed, low-cost broadband networks. However, issues including APT attacks, data leakages, credit card frauds, and compliance still persist. IDC's *Japan Security Products and Services* analyzes the evolving security market in Japan, including security hardware, software, and services. This service provides in-depth and detailed analyses of security product vendors, service providers, and end users with market forecasts, product trends, vendor strategies, and vendor rankings. In addition, this service provides enhanced coverage of the security services market. In 2017, this service will enhance several research to the cloud security and IoT security market.
