

# Japan Personal Computing Quarterly Model Analysis

---

IDC's *Japan Personal Computing Quarterly Model Analysis* is designed to meet the demand for detailed information on the PC market, excluding the x86 server, in Japan. This service delivers timely and comprehensive information on various topics, ranging from market performance of new product categories to market dimensions by users, all of which are critical to decision makers. This research provides relevant, in-depth, and critical market intelligence that is essential for strategic and tactical planning in the Japan PC market segment. The 2018 version supports fiscal-year (April to March) terms in historical and forecast data.

---

## Technology Coverage

This tracker provides total market size and vendor share for the following technology areas. Measurement for this tracker is in shipments, installed base, and factory revenue. (Installed base is provided by OS as an add-on.)

### Core Coverage

- PC product category (desktop PC and notebook PC)
- PC product (desktop PC, notebook PC, mobile notebook PC, and mini notebook PC)
- PC product detail (traditional desktop, all-in-one desktop, traditional notebook PC, ultra slim notebook PC, and mini notebook PC)
- PC specifications (CPU, HDD, optical drive, etc.)
- PC shipment and value forecast by company size by sales channel

### Optional Content Add-Ons

- PC shipment by user segment by channel shipment unit
  - PC historical installed base by OS
- 

## Geographic Scope

- Japan
- 

## Forecast Coverage

Forecasts for this tracker are updated quarterly and include two years of historical data, two years of quarterly forecasts, and an additional five years of annual market projections. Forecasts are available at the country level. Examples of the forecasts included in this tracker are as follows:

### Core Forecast Coverage

- PC shipment and value forecast by product
- PC shipment and value forecast by company size
- PC shipment and value forecast by sales channel

### Optional Forecast Add-Ons

- PC shipment by user segment by channel shipment unit
  - PC historical installed base by OS
- 

## Deliverables

This tracker is delivered on a quarterly basis with tools such as pivot tables. Deliverables for this tracker are listed below. For a complete delivery schedule, please contact an IDC sales representative.

- Preliminary top 10
- Historical data
- Forecast data
- PC shipment by user segment by channel unit (add-on)
- PC historical install base by OS (add-on)

---

## IDC's Tracker Methodology

IDC's tracker data is developed using a rigorous methodology that includes well-planned and well-coordinated local, regional, and worldwide data cross-checks combined with a proprietary advanced data consolidation and analysis data platform managed by IDC's Worldwide Tracker organization. Data sources used in the process of determining IDC's tracker numbers include, but are not limited to:

- In-country local vendor interviews
- Distribution data feeds
- Worldwide and regional vendor guidance
- ODM data
- In-country local channel partner discussions
- Import records
- Feedback from component suppliers
- Vendor briefings and public financial reports

---

## Enabling Better Business Decisions Across the Organization

IDC trackers provide the accurate and timely market size, vendor share, and forecast information you need to identify market and product expansion opportunities, increase revenues, and win market share. IDC's tracker research is a critical input to the planning and monitoring cycles of the business process. Common uses of the tracker data include:

### Planning Process

- Regional, state or city-level planning — setting regional, country, state or city-level sales targets based on market opportunity
- Product marketing — creating a product strategy and road map based on currently available product features and expected growth
- Production planning — using customer demand data as an input in the creation of production schedules
- Product portfolio planning — accessing accurate and detailed data as an input into the product development process

### Monitoring Process

- Performance measurement — comparing vendor performance on prior fiscal periods
- Competitive analysis — reviewing competitor performance across multiple dimensions: product, features, channel, segment, geography
- Sales forecasting measurement — assessing internal sales forecast versus actual results
- Price benchmarking — comparing vendor versus market pricing data by model
- Marketing communications — using positive results for messaging in the press, at partner events, or in sales collateral

## IDC's Global Tracker Process at Work

---

Tracker is a registered trademark of International Data Group, Inc.

International Data Corporation (IDC) is the premier global provider of market intelligence, advisory services, and events for the information technology, telecommunications, and consumer technology markets. With more than 1,100 analysts worldwide, IDC offers global, regional, and local expertise on technology and industry opportunities and trends in over 110 countries. IDC's analysis and insight helps IT professionals, business executives, and the investment community to make fact-based technology decisions and to achieve their key business objectives. Founded in 1964, IDC is a subsidiary of [IDG](#), the world's leading technology media, research, and events company. To learn more about IDC, please visit [www.idc.com](http://www.idc.com).
